

Foster Kitten Health Log

Kitten Name:

Date and Time	Weight (neonates in grams)	Stool	Urine	Appetite	Amount eaten (neonates in mL)	Comments/Observations

BOTTLEFEEDERS: Weigh each kitten and stimulate before feeding and refer to the Bottlefeeder Stomach Capacity chart to determine how much to feed your kitten.

Record each weight for each feeding and document stool, urine, and amount eaten.

For nursing moms and litters, you cannot record the amount eaten. Weigh the kitten daily at the same time each day.

APPETITE DESCRIPTORS

0 = No appetite; not eating*

1 = Poor appetite; eats small amount*

2 = Good appetite; eating well

3 = Above average appetite; eats like starving

STOOL DESCRIPTORS

X = Normal stool; no worms

S = Soft stool

W = Watery consistency stool*

B = Bloody stool*
